Automations That Run Your Business

10 set-and-forget systems that fulfil, follow up, and post while you sleep.

Ten automations that quietly run your business while you sleep. Each shows the trigger, the action, the tools, and how to set it up. Start with #1 — you can't fulfil orders by hand once traffic hits.

Before you start

You'll use a free no-code tool — n8n, Make, or Zapier — to connect your apps. Each automation below is a simple 'when this happens, do that.' Build one, test it, turn it on, move to the next.

1. Instant order delivery

Trigger: new purchase. **Action:** email the buyer their download + tag them in your email tool. **Tools:** Stripe/store webhook → email → MailerLite.

→ **Set up first: fulfilment must be automatic before you run any ads.**

2. Lead capture → welcome

Trigger: someone grabs your freebie. **Action:** deliver it and start the 5-email welcome sequence. **Tools:** form → email automation.

3. Social scheduler

Trigger: a finished post lands in a folder or sheet. **Action:** publish/schedule it to TikTok, IG, YouTube, and Pinterest. **Tools:** Drive/Sheet → n8n → social APIs.

4. Abandoned-cart rescue

Trigger: checkout started, not finished. **Action:** send a 3-email nudge handling the top objection. **Tools:** store webhook → email.

5. Review / testimonial request

Trigger: 3 days after delivery. **Action:** ask for a testimonial with 3 easy questions. **Tools:** delay → email.

6. Content repurposer

Trigger: you save a new idea. **Action:** AI turns it into 5 formats and drops them in your content sheet. **Tools:** Sheet → AI node → Sheet.

7. New-sale alert

Trigger: any sale. **Action:** ping your phone (Telegram/Slack) with the amount and product. **Tools:** webhook → messenger. (Great for motivation.)

8. Daily metrics digest

Trigger: every morning. **Action:** pull sales, traffic, and email stats into one message your COO employee reviews. **Tools:** schedule → APIs → message.

9. Affiliate / referral tracker

Trigger: referred sale. **Action:** log it and credit the referrer. **Tools:** store → sheet/CRM.

10. Weekly demand scan

Trigger: every Monday. **Action:** collect trending questions and competitor complaints into a 'build-next' list. **Tools:** schedule → AI research → sheet.

Turn it on

Build #1 today; add one per week. Within two months your store fulfils, follows up, posts, and reports on its own — that's leverage. Want these pre-built and wired to your store? The Income HQ membership installs them for you.
